### **DETAILED ACTION**

This is the first office action in response to the above identified patent application filed on 2/23/2004

#### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species: **I)** the species of Figure 2; **II)** the species of Figures 3, 9 and 10; **III)** the species of Figure 4 and 11; **IV)** the species of Figures 5 and 12; **V)** the species of Figure 6; **VI)** the species of Figure 7; **VII)** the species of Figure 8. The species are independent or distinct because: one embodiment claims a recovery high level heat using a heat transfer fluid; another embodiment claims recovery of high level heat using a heat transfer fluid plus a high pressure steam from gasification; another embodiment claims recovery of high heat level from IGCC using a heat transfer fluid; another embodiment claims using butane solvent in the ROSE unit, and another embodiment claims exporting low pressure steam from the ROSE unit for use in the gas cleaning and IGCC system.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 3746

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
